

2012 SSEF Mortality Report

- *This form is required for all research involving vertebrate animals. This form must be completed at the conclusion of research even if no deaths occurred.*
- *In accordance with ISEF Rules no group or subgroup may exceed a 30% rate of mortality.*
- *Rate (%) of mortality = # of deaths / # of test subjects used x 100*
- *% Mortality must be calculated for each group, subgroup, and the total research population.*

Registrant's Name: _____
First Name Middle Initial Last Name Sir Title (Jr., II, etc)

Project Title: (must match ABSTRACT title)

Genus/Species Name: _____ Common Name: _____
R

Study Group Statistics:	NUMBER Used	NUMBER Deaths	% Mortality
--------------------------------	--------------------	----------------------	--------------------

<i>Control Group:</i>	_____	_____	_____
-----------------------	-------	-------	-------

Experimental Factor: (No Exposure or Treatment)

Cause(s) of Death: _____

Study Group Statistics:	NUMBER Used	NUMBER Deaths	% Mortality
--------------------------------	--------------------	----------------------	--------------------

<i>Experimental Group #1</i>	_____	_____	_____
------------------------------	-------	-------	-------

Experimental Factor: _____

Cause(s) of Death: _____

Study Group Statistics:	NUMBER Used	NUMBER Deaths	% Mortality
--------------------------------	--------------------	----------------------	--------------------

<i>Experimental Group #2</i>	_____	_____	_____
------------------------------	-------	-------	-------

Experimental Factor: _____

Cause(s) of Death: _____

Study Group Statistics:	NUMBER Used	NUMBER Deaths	% Mortality
--------------------------------	--------------------	----------------------	--------------------

<i>Experimental Group #3</i>	_____	_____	_____
------------------------------	-------	-------	-------

Experimental Factor: _____

Cause(s) of Death: _____

TOTAL NUMBER USED: _____ TOTAL DEATHS: _____ TOTAL % MORTALITY: _____
